

Materials List

4 Extra-Large Jump Rings
SS14 base metal
14 SWG 3/4" (19.05 mm)

2 Small Jump Rings
J18 base metal
18 SWG 7/32" (5.6 mm)

4 Large Jump Rings
CC14 base metal
14 SWG 1/2" (12.7 mm)

2 Tiny Jump Rings
D18 base metal
18 SWG 1/8" (3.2 mm)

4 Medium Jump Rings
N16 base metal
16 SWG 9/32" (7.1 mm)

2 earwires

Note about tools:
For this project, we recommend using wide pliers—such as duck-bill-spliers to have good leverage when working with the large and extra-large rings.

Prep (per earring):

Pre-close one medium, large and extra-large ring

Pre-open one of each of the 5 sizes of rings used for the project.

1. Add a tiny ring to the earwire and close.

2. With the open small ring, scoop up the medium, large & extra-large pre-closed rings. Before closing the small ring, also weave through the tiny ring attached to the earwire. Close the small ring. ▶

3. Weave the open extra-large ring through the center of all 3 rings and close. ▶

4. Weave the open large ring through the large and extra-large from step 2, and close. ▶

5. Weave the final open medium ring through the extra-large ring from step 2. Be sure to avoid also weaving through any additional rings when weaving this final ring. ▶

6. Repeat to complete your second earring.

You're done!
