

Materials List

5 Extra-Large Jump Rings
SS14 base metal
14ga SWG 3/4" (19.05 mm)

4 Large Jump Rings
P16 base metal
16ga SWG 5/16" (7.9 mm)

4 Medium Jump Rings
L16 base metal
16ga SWG 1/4" (6.4 mm)

1 Small Clasp Ring
H18 base metal
18ga SWG 3/16" (4.8mm)

4 Tiny Jump Rings
B20 base metal
20ga SWG 3/32" (2.4 mm)

12"-18" pre-made chain
1 lobster claw

Note about tools:
For this project, we recommend using wide-nosed pliers such as our duck bill pliers to help control the extra-large rings as you are closing them.

BUILDING BLOCK REQUIRED: *Flowers Bracelet*

Möbius Ball Necklace uses the techniques learned in our *Flowers Bracelet* building block tutorial, available for FREE on our website. Please make sure you are comfortable with these introductory techniques before proceeding, as they are not included in this tutorial.

Prep : Using wire cutters, cut the pre-made chain into two parts, one measuring about 1.5" (3.8 mm) and the other measuring between 12" and 16" depending on your desired length for the necklace. Connect the two pieces as shown below using the tiny, small clasp and medium rings. Set aside until step 3.

1. Make mobius ball using extra-large rings.

2. Add a chain of 3 large rings to the mobius ball. Close all rings.

3. Add a fourth large ring to the end of your 3-ring chain and before closing, weave it through the mobius ball and also slide on the final medium ring connected to your pre-made chain. Close the large ring.

Note : You can attach the lobster claw to the chain in two different ways for two different looks!

Alternate sizes (sterling silver):

Extra-large = T14
14ga AWG 3/8" (9.5 mm)
Medium = H18
18ga AWG 3/16" (4.8 mm)
Small = D18*
18ga AWG 1/8" (3.2 mm)

Note: There is no additional clasp ring used to attach the SILV lobster, simply attach it right to the medium ring.

*In step 2, create a chain of 1 medium ring and then 2 small. In step 3, use another medium ring in place of the large.
